

ASCA GmbH & Co. KG, located in Kitzingen, Germany and part of the HERING group (www.heringinternational.com), is among the world leaders in the field of organic photovoltaics (OPV). ASCA produces printed organic solar cells with a focus on client-specific solutions. In addition, the company is also active in research and development to provide its clients with creative and innovative solutions. ASCA uses a unique production process, combining printing, lamination, and laser techniques. This advanced technology is easily scalable and allows the production of the utmost individual, customer-specific designs. ASCA also helps clients with system solutions in order to integrate OPV into already existing or new products. More information can be found at www.asca.com.

To support our team at the earliest possible date we are looking for a **Head of Machine and Software Development (m/w/d)** on a full-time basis.

Your main responsibilities

- Development of innovative machines for OPV manufacturing from concept to production release as well as upgrading and maintenance of existing machinery.
- Independent handling of internal development projects supported by a team of mechanical and software engineers.
- Supervision with regard to deadlines and costs.
- Close exchange with the division management to ensure the success of the projects.
- Compliance with safety regulations and ensuring of quality assurance.

Your profile

- You have a degree, preferably PhD, in mechatronics, mechanical engineering, manufacturing engineering or related subjects or equivalent qualification acquired through professional experience.
- You have at least five years of professional experience in machine and plant engineering.
- Preferably you also have knowledge in organic and/or printable photovoltaics. Additionally, programming skills are a plus.
- You are a team player with leadership experience and a high level of organizational talent.
- You have high levels of initiative and motivation and like to lend a hand yourself.
- You impress with your determined and performance-oriented working style as well as proactive problem-solving skills.
- Your profile is round off by excellent communication and argumentation skills.
- Your fluent proficiency in spoken and written English, and preferably also in German, helps you in your daily communication with your colleagues.
